

# GREY WHALE (*Eschrichtius robustus*)

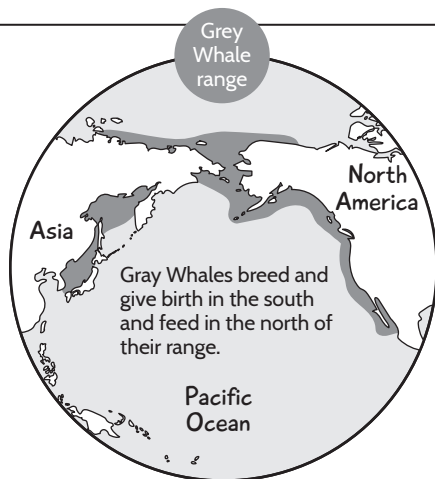

## Learn!

**Length:** 40-50ft (13-15m)

**Weight:** 30-40 tons  
(about the same weight as  
5 adult African elephants!)

**Average Life Span:**  
60 years

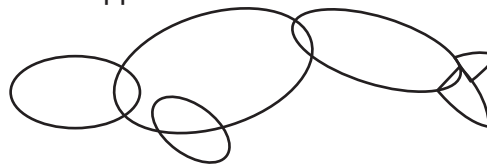

**Annual Migration:** up to  
over 10,000 miles per year!

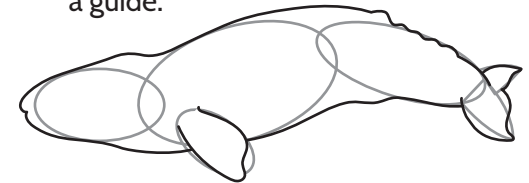

## Draw!

On a separate sheet of paper, use the steps below to draw your very own Grey Whale!

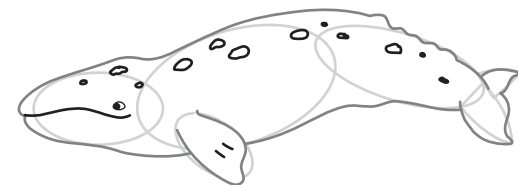

1. **Make 3 ovals** to create the shape of the body and 2 little triangles to create the fluke. Add 1 small oval for the flipper.

2. **Create an outline** of the whale's body using the shapes you drew in the last step as a guide.

3. **Add details** including a mouth, eyes, and barnacles.
